- Able to work effectively and use spare time productively

Academic/Personal Projects

Miri - game development term project

- For Design and Construction of Games and Interactive Systems class
- Puzzle Platformer with four playable characters, each with unique abilities. Could only control one at a time, and had to use them in a way to get all of the characters to the end of the level
- Worked in a close team of four, developing using C# in Unity
- Mainly worked on Interface Design, Movement and Camera System Prototypes, Artwork/Sprites, Animations, and Testing

Client portfolio website

- Developed a portfolio website for a University of Saskatchewan professor as a part of Website Design and Development class
- Worked in a team of four, developed in HTML, CSS, Javascript, and jQuery
- Included a table of publications that was able to be sorted by name, date, and author(s) using javascript
- Kept up strong communication with client to determine needs and expectations, and to highlight future changes in the project
- Developed and designed to work on all browsers and mobile devices

Personal portfolio website (benleeche.ca)

- A personal website to showcase my portfolio and to display relevant information about me
- A focus on minimalistic, responsive design
- Developed with HTML, CSS, and jQuery
- Made some custom SVG images using Affinity Designer
- Website is completely managed via ssh access on bash shell
- Developed with the intention to make future additions of content as easy as possible
